**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
(Canadian Dollars)  
December 31, 2013

**1. NATURE AND CONTINUANCE OF OPERATIONS**

The Company was incorporated on July 19, 2007 under the Business Corporations Act of the Province of British Columbia. The Company's principal business is the acquisition, exploration and development of mineral properties. The Company's registered and records office is at Suite 700, 625 Howe Street, Vancouver, BC, V6C 2T6. The Company's head office is at Suite 1610, 409 Granville Street, Vancouver, BC, V6C 1T2.

At the date of these consolidated financial statements, the Company has not been able to identify a known body of commercial grade ore on any of its mineral property interests. The ability of the Company to realize the costs it has incurred to date on these mineral property interests is dependent upon the Company being able to identify a commercial ore body, to finance its exploration costs and to resolve any environmental, regulatory or other constraints which may hinder the successful development of the mineral property interest. To date, the Company has not earned revenues and is considered to be in the exploration stage.

These consolidated financial statements have been prepared assuming the Company will continue on a going-concern basis. The Company has incurred losses since inception and the ability of the Company to continue as a going-concern depends upon its ability to develop profitable operations and to continue to raise adequate financing. Management is actively targeting sources of additional financing through alliances with financial, exploration and mining entities, or other business and financial transactions which would assure continuation of the Company's operations and exploration programs. In order for the Company to meet its liabilities as they come due and to continue its operations, the Company is solely dependent upon its ability to generate such financing. These material uncertainties cast significant doubt on the Company's ability to continue as a going concern.

These consolidated financial statements were authorized by the Board of Directors of the Company on February 27, 2013.

**2. BASIS OF PREPARATION**

This condensed interim consolidated financial information for the six months ended December 31, 2013, has been prepared in accordance with IAS 34, 'Interim Financial Reporting'. The condensed interim consolidated financial information should be read in conjunction with the annual financial statements for the year ended June 30, 2013, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

These unaudited condensed interim consolidated financial statements have been prepared using accounting policies consistent with those used in the Company's annual financial statements for the year ended June 30, 2013.

The preparation of these consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported expenses during the period. Actual results could differ from these estimates.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- i) The recoverability of receivables which are included in the consolidated statements of financial position;
  - ii) The carrying value and the recoverability of mineral property interests, which are included in the consolidated statements of financial position;
  - iii) The inputs used in accounting for share-based compensation expense, which are included in the consolidated statements of operations & comprehensive loss; and
- i) The amount of deferred income taxes recognized.

*Critical accounting judgments*

Examples of significant judgments, apart from those involving estimation, include:

- the accounting policies for mineral property interests;
- classification of financial instruments; and
- determination of functional currency.

**5. MINERAL PROPERTY INTERESTS**

Title to mineral property interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral claims. The Company has investigated title to all of its mineral property interests and, to the best of its knowledge, title to all of its interests are in good standing.

**9. FINANCIAL AND CAPITAL RISK MANAGEMENT**

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

**9. FINANCIAL AND CAPITAL RISK MANAGEMENT (cont'd...)**

The fair value of the Company's receivables, accounts payable and accrued liabilities, approximate carrying value, due to the short-term nature. The Company's other financial instrument, cash, under the fair value hierarchy, are based on level one quoted prices in active markets for identical assets or liabilities. The Company is exposed to varying degrees to a variety of financial instrument related risks:

*Liquidity risk*

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at December 31, 2013, the Company had cash of \$2,216 (June 30, 2013 - \$81,712) to settle current liabilities of \$455,089 (June 30, 2013 - \$377,451). Management needs to secure additional funding in order to meet its current liabilities and operating expenses as they become due while completing an equity financing.

*Market risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

a) Interest rate risk

The Company has cash balances and interest-bearing investments. The interest earned on the investments approximates fair value rates, and the Company is not at a significant risk to fluctuating interest rates. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its financial institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

The risk that the Company will realize a loss as a result of a decline in the fair value of the short-term investments included in cash is minimal because of the short-term nature of these investments.

b) Foreign currency risk

The Company is not exposed to significant foreign currency risk on fluctuations related to cash and accounts payable and accrued liabilities that are denominated in United States dollars ("US\$") and Mexican pesos ("MX\$"). The Company does not use derivatives or other techniques to manage foreign currency risk.

c) Price risk

The Company is exposed to price risk with respect to commodity prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors the commodity prices of precious metals, and the stock market to determine the appropriate course of action to be taken by the Company.

Based on management's knowledge and experience of the financial markets, management does not believe that the Company's current financial instruments will be affected by interest rate risk, currency risk and credit risk.

*Credit risk*

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations.

The Company's cash is held at large Canadian financial institutions in interest bearing accounts. The Company has no investment in asset backed commercial paper.

The Company's receivables consist mainly of HST/VAT due from the governments of Canada and Mexico. As such, the Company does not believe it is subject to significant credit risk.

**9. FINANCIAL AND CAPITAL RISK MANAGEMENT (cont'd...)**

*Capital management*

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going-concern in order to pursue the exploration and development of its mineral properties, acquire additional mineral property interests and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes components of shareholders' equity. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

The Company currently is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management.

**10. SUBSEQUENT EVENTS**

The Offering may be closed in tranches; and is subject to due diligence by potential investors, to be completed within 60 days. Each Unit will consist of one common share of the Company and one full common share purchase warrant ("Warrant"). Each Warrant will entitle the holder to purchase one common share of the Company for a period of 24 months from the closing date of the Offering at a purchase price of \$0.05 per common share, provided however, the Company may accelerate the exercise the period of the Warrants under certain conditions.
